# S. KANN, SONS & CO.

Always the Best of Everything for the Least Money.

## 10,000 Yds. of Fine Fancy Silks.

At the last moment we caught on to another rich deal in silks. When we were writing this advertisement we never dreamed of finding such a Klondyke. A manufacturer closed out to us the entire balance of his fine silks which were loomed and made for this season's trade. His fall dyes were cast aside and his mill put in readiness for next season's patterns. The first in his mind was the Busy Corner, because he knew we could use big lots, especially where the price made up the difference. Such a treat as this may occur every seven years, like the locust plague, but not any oftener. To give you an idea of what is to be had from among this big assortment of silks, we will I mention Hemstitched Taffetas, Plain Taffetas of excellent quality, Jacquard Effects, Satin Striped Taffetas, Faconne Taffetas, Peau de Soies in black and colors, Popelaines in black and colors, and many other pretty and exclusive conceits

which are known to the silk world. This entire purchase, which we know to be stupendous in value and phenomenal in price, will be sold at-per yard.....

Centre bargain tables, first floor, main aisle.

#### Domestics.

To introduce a special brand of Sheets that are made for us of the best grade of cotton cloth, full size, hand-torn, and ironed, they are priced as follows:

#### AFFAIRS OF THE DISTRICT.

The Question of Extension in Time on Engineer Work.

It Is Best to Be Lenient With Contractors-Three Firemen Assume

The Cranford Paving Company has written to the Commissioners requesting that in the extension of time granted for the completion of contract for the construction of Connecticut Avenue Bridge the cost of inspection be not charged against them. The company state that considerable delay was caused by the ex-June and July, and that the extension was requested to cover the time lost on account of the heat. They also stated that it was their opinion that the charge for inspection contained in the order granting the extension of time was contrary

The matter was referred to Capt. H. C. lewcomer, who at the time the orde ranting the extension was made was Acting Engineer Commissioner, and he has reported confirming the statement of the company, and explaining that the clause referred to in the order was incorcornted therein owing to inadvertence

ciause referred to in the order was incorporated therein owing to inadvertence on his part.

In considering the matter, Captain Beach, the Engineer Commissioner, has made the following statement relative to the proper stand to be taken in this and similar cases:

"I believe there is sufficient authority in the Commissioners to determine whether the delay in the completion of the work was due to the fault of the contractor or not. It is manifestly to the disadvantage of the District to require that all extensions be made at the expense of the contractor, for so many conditions and circumstances interfer to prevent the completion of engineering work upon calculated time that if it is understood that all such extensions must be at the cost of the contractor, the only result will be that the prices in the bids received will be increased, as contractors will naturally fix prices which will protect them under all circumstances. But if they understand that the office will take an equitable view of the circumstances of the case, they will feel justified in submitting a bid for the amount for which the work can be done, and not include all possible charges, which they must do if all extensions are to be made at their expense. The District itself, in spite of all efforts, frequently falls to finish work within a calculated time. It is believed the circumstances of this case justify the extension of the contract without penalty or cost of inspection, and I so recommend."

The Commissioners yesterday approved the application of G. W. Harbaugh, in-spector in the Street Cleaning Depart ment, for an allowance of \$20 a month for maintenance of horse and buggy in connection with his official duties. Warner Stutler, Superintendent of the De-partment, in reporting the request to the Commissioners, said:
"The statements contained in Mr. Har-

"The statements contained in Mr. Harbaugh's application relative to the territory inspected by him are correct, and it is believed that the reasons assigned for not riding a wheel are such that he smould not be required to use one. A large part of the territory covered by Mr. Harbaugh cannot be reached by car, and he is, therefore, obliged to walk, thus very often causing delay in attending to complaints, especially when it is necessary to visit suburban districts.

"J. E. Kitzmiller, inspector in the same class of work, who also has charge of suburban sections similar to Mr. Harbaugh's, is allowed \$20 per month for use of horse and buggy. I would, therefore, respectfully recommend that a like allowance be made for Inspector Harbaugh, to be paid out of the appropriation for the collection and disposal of city, refuse, believing that the service will be benefited thereby, said allowance to take effect November I."

Robert W. Dutton, Chief Engineer of the Commissioners a report upon the recent accident to the apparatus of chemi-cal engine No. 3, at Tenleytown. It appears that while the company was re-sponding to an alarm of fire two of the horses attuched to the engine fell and horses attached to the engine real and broke the two poles of the apparatus, the lorses escaping with only very slight injuries. Chief Dutton in his report said: "After fully investigating the accident, which occurred on the first run of the company. I reached the conclusion that the forward of the company. Thomas in-

E. L. Troup; of 419 Fourteenth Street northeast, has entered complaint against the position of the steps and board walk on the premises at the corner of Four teenth and Duncan Streets northeast, and has requested the authorities to correct the dramage of Duncan Street. Investi-gation shows that there is no record of a permit for the construction of the steps.

permit for the construction of the steps, and the inspector was informed that the structure was built to afford access to the houses of J. T. Moxley, on Duncan Street.

The Computing Engineer, in forwarding the information to the Commissioners, recommends that Mr. Moxley be informed that the board walk and steps referred to encreach upon the parking, and that he is required to remove them, so that no part of the same shall encreach upon the building line. It was also reported to the Commissioners that the defective drainage on Duncan Street would be corrected when the sprading that has been ordered shall have been done.

The Chief Engineer of the Fire Department today forwarded to the Commissioners a report upon the case of Assistant Foreman J. T. Brown, of Engine Company, No. 14, who was summoned before the Trial Officer charged with neglect of duty, and found guilty. It appears that while running to a fire, there was a fail-ure to secure properly on the hose car-riage what is known as the 'deluge set' and it was so injured as to be unlit for ervice. Chief Dutton states that luasmuch as

Assistant Foreman Brown was in charge of the company, and was, there-fore, directly responsible for the safety of the appliance, he recommends that Brown be deprived of his days off for one month. month.

This recommendation has been approved by Commissioner Mucfarland and habeen forwarded to the Board for its ac-

Joseph Hurdle recently wrote to the District Commissioners complaining that the water had been cut off from premises 1539 Thirty-second Street northwest. The complaint was referred to the Water Decomplaint was referred to the Water Department, and the Registrar has reported that premises 1538 and 1541 Thirty-second Street are supplied through a single service pipe passing through 1541.

He soys, further, that, upon the failure of the latter place to pay the water rent the supply was cut off, thus depriving both houses of water. The rent was paid a day or so later, and the Registrar states that the supply has been restored. He has recommended that the complainant be informed of the facts and advised that it will be necessary to provide a separate service pipe for premises 1538 in arder to avoid annoyance in the future. This plan with be pursued.

Nathaniel McKay, of 1008 Thirte-att Commissioners requesting the removal of vault in the parking in front of fall K

officer in charge of the aqueduct.

a vault in the parking in front of 13H K
Street, so that a new curb can be set. Mr.
McKay objects to the condition of the
brick work, and aska to have it repaired
or made over, to conform the better with
the surroundings.

Investigation showed that the vault in
question contains a valve water connection belonging to the Washington Aqueduer. At the suggestion of Captain Hardling, Aristonia to the Engineer Commissection, the complainant will be informed
of the facts above stated, and referred to
the officer in charge of the aqueding.
